

Instructions

Presentation will be done using a recorded video and a live Q&A. The video presentation should be uploaded in easychair together with the camera ready paper in pdf version.

Video File

- Length of the video should be at least 10 minutes.
- Maximum length of the video is 12 minutes.
- Maximum file size is 100MB.
- Format of the video file should be MP4.
- Minimum height is 480 pixels
- Vide aspect ration 16:9

Recommended tool for recording is the recording tool of zoom (which will be used by HNICEM).). It suffices to create a meeting where the speaker is the only participant, share the screen (the slides) and activate the camera of your laptop so that the speaker's face is visible. Then, through the "Record" button you can easily generate your video. Please refer to the following link for further indications: <https://support.zoom.us/hc/en-us/articles/201362473-Local-Recording>

Please also note that the 16:9 aspect ratio for your video is well associated with the 4:3 aspect ratio of your slides, so that there will be enough room for your thumbnail at the side of the slides, as in the image below:

II. → EASE OF USE ¶

A. → *Selecting a Template (Heading 2)* ¶
 First, confirm that you have the correct template for your paper size. This template has been tailored for output on the A4 paper size. If you are using US letter-sized paper, please close this file and download the Microsoft Word, Letter file. ¶

B. → *Maintaining the Integrity of the Specifications* ¶
 The template is used to format your paper and style the text. All margins, column widths, line spaces, and text fonts are prescribed; please do not alter them. You may note peculiarities. For example, the head margin in this template measures proportionately more than is customary. This

- → Use either SI (MKS) or CGS as primary units. (SI units are encouraged.) English units may be used as secondary units (in parentheses). An exception would be the use of English units as identifiers in trade, such as "3.5-inch disk drive". ¶
- → Avoid combining SI and CGS units, such as current in amperes and magnetic field in oersted. This often leads to confusion because equations do not balance dimensionally. If you must use mixed units, clearly state the units for each quantity that you use in an equation ¶
- → Do not mix complete spellings and abbreviations of units: "Wb.m2" or "webers per square meter", not "webers m2". Spell out units when they appear in text: "... a few henries", not "... a few H". ¶
